

SPACE TRACE

VIRTUAL WORLD, REAL
BUSINESS

PRESENTED BY
OLIVER GEORGIU

THE PROBLEM

**“Photos don’t sell experiences.
Hospitality & sports venues
lose bookings because guests
can’t ‘feel’ the space online.”**

THE SOLUTION?

SPACE TRACE

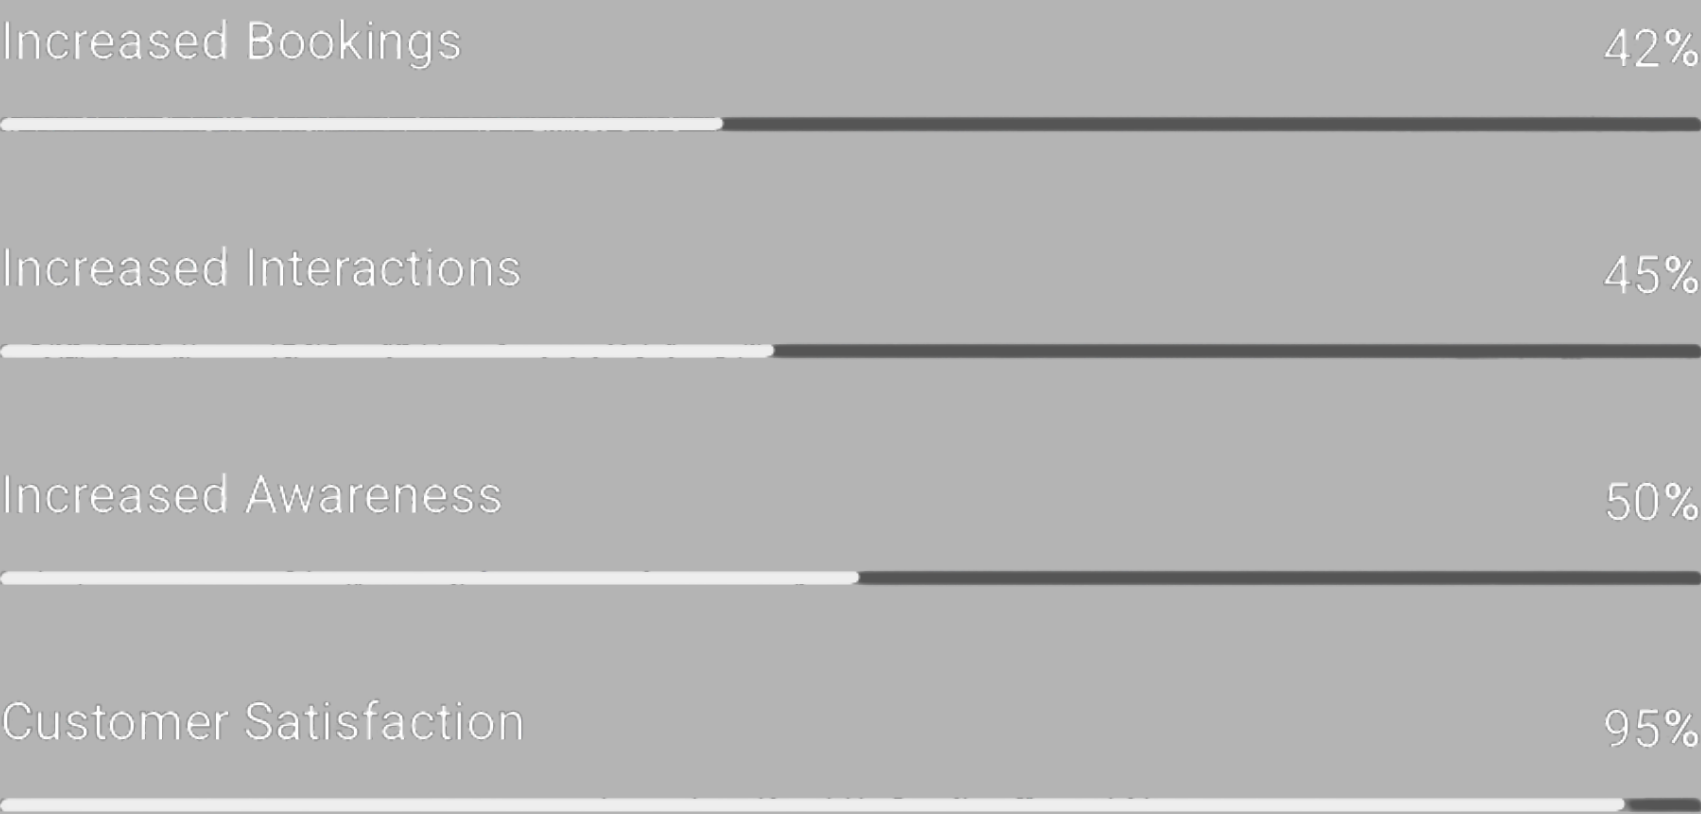

At Space Trace, we transform the way venues are experienced online. Instead of relying on flat photos or videos, we create fully immersive 3D tours that allow potential guests to step inside your space from anywhere in the world. Each tour is more than just a virtual walk-through, it's an interactive sales tool. Calls-to-action are built directly into the experience, so a customer can book a table, reserve a suite, or enquire about hospitality packages without ever leaving the tour. Behind the scenes, every interaction is tracked, giving venues detailed analytics on visitor behavior, engagement hotspots, and conversion rates. The result is simple: higher engagement, smarter marketing, and more bookings.

WHY IT MATTERS

“EXPERIENCES SELL SPACE.”

When potential guests can step inside a venue online, engagement increases dramatically and engagement drives bookings. Every interaction inside a Space Trace tour is tracked, providing analytics that help venues understand customer interest and optimize marketing. In competitive hospitality and sports markets, offering an immersive, interactive experience sets you apart instantly.

Space Trace is already powering immersive experiences for leading names in hospitality and sport. From global hotels like Hilton and Bulgari to major football clubs including Newcastle, Brighton, and Preston, as well as venues like Headingley Stadium, our platform has proven its ability to engage customers, increase bookings, and showcase spaces at the highest level. These partnerships demonstrate both the versatility of our technology and the confidence that top brands place in us.

HOW IT WORKS

SIMPLE PROCESS, POWERFUL RESULTS

Getting started with Space Trace is straightforward. First, we scan your venue using advanced 3D technology. From there, our team builds a custom interactive tour that reflects the atmosphere and unique qualities of your space. The finished tour can be shared anywhere. On your website, across social media, or even in VR, making it easy for potential guests to explore from any device. Every tour also comes with built-in analytics, giving you a clear view of how visitors interact with your space and where they convert. The result is a sales and marketing tool that works 24/7, turning online interest into real-world bookings.

WHO WE ARE?

Our founders bring over 30 years of combined experience in media, photography, and hospitality. Beyond their expertise, they are driven by a passion for creating meaningful experiences and helping venues connect with guests in new ways. Their leadership combines creativity, insight, and a deep understanding of what makes spaces memorable, making Space Trace more than a tool, but a team committed to elevating every venue they work with.
